

To create elisa_courante: clean courante and keep var I need

For imputing products: create
estimation_product_dta, with
Imputed products

To create 5 databases:
Merge elisa_courante with
Estimated products and
Sectors and dave databases
For analysis

For imputing sectors: create
estimation_secto_dta, with
Imputed SITC

Hamburg1: analysis on the
Aggregate exports

Hamburg2: analysis by product

Allcountry1: analysis on the
Aggregate of all countries

Allcountry2: analysis by product

Allcountry2_new:

- Cluster and factor analysis
- Regression with new groups
- Regressions with sitc classification
- Regression with sitc and groups of countries
- Regression with sitc and groups of wars
